## Parts of a Plant

petal	leaf	flower	stem	root
-------	------	--------	------	------

This part takes water and minerals from the soil to the rest of the plant.

This part is where water and dissolved nutrients travel up in a system of small tubes.

This part takes in carbon dioxide from the air, water from the soil, and energy from the sunlight.

This part is where the pollen is located that is used to make more plants.

This part has bright colors which attract pollinators like insects and bees.
