* In order for pre-kindergartens to be included in a K-8, K-10, or K-12 school evaluations and accreditations, they must be operating per Southern Union Board of Education Code definition of and policies for school-based pre-kindergarten programs, and employment policies for school teachers.

PREFACE

The Evaluative Criteria for Seventh-day Adventist Schools is the basis for the evaluation and accreditation of all schools in the North American Division.

The Evaluative Criteria are published in the following versions:

- a. Evaluative Criteria for Seventh-day Adventist Schools, Small Schools
- b. Evaluative Criteria for Seventh-day Adventist Schools, Grades K-8
- c. Evaluative Criteria for Seventh-day Adventist Schools, Grades K-10
- d. Evaluative Criteria for Seventh-day Adventist Schools, Grades K-12
- e. Evaluative Criteria for Seventh-day Adventist Schools, Grades 9-12
- f. Evaluative Criteria for Southern Union Conference Seventh-day Adventist Schools grades Pre-8, PreK-10, PreK-12
- g. Evaluative Criteria for Southern Union Conference Early Childhood Programs

This instrument is the basis for the self-study. The instrument contains instructions and details the responsibilities for those persons and committees involved in the evaluation process and for completing the self-study. The completed self-study instrument becomes the Self-study Report.

INTRODUCTION

The Accrediting Association of Seventh-day Adventist Schools, Colleges, and Universities, Inc. (AAA) is the denominational accrediting authority for all educational institutions and programs operated in the name of the Seventh-day Adventist Church. It fosters close cooperation among the educational institutions of the Adventist system and effective working relationships with other educational organizations or institutions, accrediting agencies, and government departments of education.

The AAA provides a process by which the educational community holds an institution accountable for its own objectives, assures the church and constituency that an accredited Adventist educational institution offers programs of quality to the youth of the church, provides professional personnel who meet both church and national standards, and provides a practical basis for reciprocity among Adventist schools.

The North American Division Commission on Accreditation serves as the agent of the AAA for accreditation of all schools in the North American Division.

The duties and functions of the North American Division Commission on Accreditation are to:

1. Establish guidelines for quality education.
2. Adopt criteria, guidelines, and procedures for evaluation visits.
3. Determine the data to be collected for the periodic review of schools.
4. Periodically review the status of each school in the North American Division.
5. Review the Visiting Committee Report, determine the term of accreditation for each school, and forward recommendations to the AAA for final action.
6. Review appeals from schools regarding the recommendations of the Visiting Committee.
7. Transact business and perform routine activities between regular sessions of the commission through the North American Division Office of Education.
8. Consider all matters referred to the commission by the North American Division Office of Education, General Conference Department of Education, and/or the AAA.
9. Initiate, process, and revise reports, recommendations, and resolutions for action by the AAA.

The Southern Union Conference in agreement with the National Council for Private School Accreditation (NCPSA) has expanded its accreditation responsibilities by offering accreditation to Seventh-day Adventist school- operated pre- kindergartens and early childhood programs.

Attention to young children is imperative to the foundation of a child character development and success. “Too much importance cannot be placed upon the early training of children. The lessons learned, the habits formed, during the years of infancy and childhood, have more to do with the formation of the character and the direction of the life than have all the instruction and training of after years.” *MH, p.380*

The Seventh-day Adventist pre-kindergartens offer opportunities for children with a minimum age of four years to extend their learning experience before the formal schooling, in a developmentally appropriate environment. Based on age, levels of development, and learning styles, such an environment fosters natural curiosity and stimulates cognitive, physical, social, emotional and spiritual growth.

In this version of the Evaluation Instrument, the Southern Union Conference Office of Education provides a process by which the educational community holds its institution maintaining any combination of classrooms/programs for pre-kindergarten children with a minimum of age of four years through grade 10, accountable for its own objectives. It assures the church and constituency that an accredited Adventist educational institution offers programs of quality to the children and families of the church and provides professional personnel who meet both church and national standards.

RATIONALE

The rationale underlying the accreditation process is the belief that it helps define the mission and goals of Seventh-day Adventist education, contributes substantially to the improvement of the total school program, and provides opportunity for involvement of the church community.

The accreditation process has three stages: the self-study, the visit by a visiting team, and the follow-up activities. The philosophy and goals for learning and development and the criteria for accreditation from the North American Division Commission on Accreditation serve as the underlying foundation for these stages.

Fundamental to accreditation is the quality of the educational program experienced by students. Thus, the accreditation process is designed to accomplish the following:

1. Assist each school in appraising the total program to determine the level to which the purposes and functions outlined in its statement of philosophy and goals for learning and development are accomplished, and the extent to which they addresses the general guidelines in the criteria for accreditation.
2. Provide a process for involving the administration, faculty, staff, local governing board, constituency, parents and students in an effective and meaningful evaluation of the program.
3. Provide an independent review of the self-study evaluation.
4. Provide the basis for action plans to address areas needing improvement.
5. Provide the basis for determining a term of accreditation.
6. Assist in coordinating the accreditation process with regional accrediting associations.

CRITERIA FOR ACCREDITATION

A school is to be evaluated based on the degree to which it fulfills the purpose and functions outlined in its statement of philosophy and goals. In addition, to qualify for accreditation it must provide evidence of adequately addressing the standards and indicators of implementation for Seventh-day Adventist schools. The following standards have been established to describe an effective program that leads to continuous improvement and results in improved learning and development.

1. **Philosophical Foundation**—The statement of philosophy of Seventh-day Adventist education should be adopted by the local governing board. Curriculum goals and objectives consistent with the philosophy should be developed and reviewed systematically by the constituency, administration, faculty, staff, parents, students, and governing body; these should be regularly communicated to the constituency. The school shall have ongoing evaluations of progress toward these goals and objectives, and it must also possess a mission statement that embodies its philosophy.
2. **Community and Constituency**—A well-defined plan and procedures should be maintained to simplify two-way communication and cooperative interaction with the local church constituency and community. This communication should be enhanced by an active recruitment-and-marketing program.
3. **Administration**—A clearly defined organizational structure should simplify program improvement; support student academic, spiritual, and social development; effectively guide the work of the administration and staff; and provide for accountability in achieving the purpose and mission. The description of the structure should also define the roles and functions of the school board, administration, faculty, staff, parents, and constituency. It will also provide and encourage effective working relationships and communication among all concerned.
4. **Staff Development**—Well-qualified faculty and staff who work cooperatively as individuals and as a team to create an environment in which effective teaching/learning/development occurs should be in place. They should support biblical values as understood and taught by the Adventist Church and hold proper credentials. The administration, in collaboration with the faculty and staff, should plan and implement an ongoing program of professional growth that focuses on learning and development.
5. **Curriculum and Instruction**—An instructional program should be implemented that is consistent with the curriculum guides of the North American Division Office of Education and sound educational practices.

The curriculum should provide all students and children with suitable courses of instruction and care consistent with the philosophy, goals, and learning expectations, as well as the individual needs, abilities, and interests.

CRITERIA FOR ACCREDITATION *(continued)*

- The delivery of curriculum will reflect the best professional practices by teachers and be the object of ongoing evaluation involving the constituency, local governing board, teachers, parents and students. The teaching load and responsibilities will be in harmony with denominational policy.
6. **Media Center**—A resource center should be provided with adequate and appropriate materials to facilitate learning.
 7. **Student Activities**—Appropriate co-curricular activities and programs should supplement the formal instruction of the school. These programs should be responsive to student needs and interests, employing the special skills of students, faculty, staff, and community resources. The activities and programs should provide opportunities for developing student leadership skills and for students to participate in a variety of Christian service activities.
 8. **Student Services**—A program should be developed using organizations and services that support the social, spiritual, physical and academic needs of students.
 9. **Program Facilities**—A safe and adequate school plant with sufficient equipment to implement the school program should be provided.
 10. **Information and Technology**—Appropriate information technology should be available and used by faculty, staff, and students to enhance the learning process and the active involvement of students.

THE ACCREDITATION PROCESS

The success of the evaluation process depends upon the cooperative efforts of the following: local governing board, principal, teachers, parents, students, members of constituent churches, and personnel from the union and local conference offices of education. The primary responsibilities of those involved in the accreditation process are indicated below.

1. **North American Division Commission on Accreditation**

The North American Division Commission on Accreditation K-12 is responsible for establishing guidelines, criteria, and procedures for evaluating schools. It officially represents the Accrediting Association of Seventh-day Adventist Schools, Colleges, and Universities, Inc., in the North American Division.

2. **North American Division Office of Education**

The North American Division Office of Education (NADOE) is responsible for supervising the accreditation process in the K-12 schools in the North American Division. The vice president for education serves as chair of the Commission on Accreditation.

3. **Union Conference Office of Education**

The responsibility of this office is to provide an adequate supply of appropriate evaluation instruments and appropriate in-servicing of the local conference office of education and school personnel on the evaluation process. The union conference office of education is responsible for overall supervision of the evaluation process for senior academies and early childhood programs in the union conference.

4. **Local Conference Office of Education**

This office is responsible for assisting the schools throughout the evaluation process.

5. **Principal**

As the agent of the local governing board, is responsible for organizing and supervising the self-study process at the school.

6. **Local Governing Board**

The local board is responsible for providing support to the principal and committees in the preparation of the Self-study Report. The school board reviews and approves action plans.

THE ACCREDITATION PROCESS *(continued)*

7. Coordinating Committee

The Coordinating Committee is composed of the principal and representatives from the Study committees and local governing board. It is responsible for:

- a. Appointing 3-5 members to serve on each Study committee.

NOTE: Where a pre-kindergarten is being evaluated, at least two members of the study committee must be professionally qualified. For this evaluative purpose, professionally qualified is defined as an individual who has an early childhood education degree (or equivalency), or an elementary education degree with kindergarten endorsement and experience. This may include but not limited to work experience as an early childhood teacher or a director in an early childhood program, in a specific field of growth and development of young children, and/or in administration of a child care facility.

- b. Coordinating and monitoring the self-study process to ensure completion of the Self-study Report according to an approved time line.
- c. Identifying and building consensus on significant school-wide areas needing improvement.
- d. Overseeing the development of school-wide improvement action plans.
- e. Establishing an ongoing follow-up process to monitor the implementation and accomplishment of each action plan.

8. Study Committee

The core of the evaluation process is the school's responses to these ten standards:

1. Philosophical foundation
2. Community and constituency
3. Administration
4. Staff development
5. Curriculum and instruction
6. Media center
7. Student activities
8. Student services
9. School facilities
10. Information technology

9. Visiting Committee

The Visiting Committee is responsible for:

- a. Reading, analyzing, and validating the Self-study Report by observing the school in operation; visiting classes; and interviewing administrators, teachers, students, and others.
- b. Preparing a report that commends the school for its areas of strength, validates action plans, and recommends specific actions to support school improvement.
- c. Recommending a term of accreditation based on the Self-study Report and on-site findings.

Checklist for Study Committee Members

Before the Visit

The responsibilities of each study committee members are to:

- _____ 1. Study the Evaluation Instrument with Introduction and Instructions to gain an understanding of the purpose for the entire evaluation process.
- _____ 2. Use the Introduction and Instructions sections, the appropriate section of the Evaluation Instrument, and the results of interviews and/or visits to complete the assigned area.
- _____ 3. Prepare the report for the assigned section(s) and suggest areas of needed improvement that may be developed into action plans by the Coordinating Committee.
- _____ 4. Submit the completed report to the chair of the Coordinating Committee.

GENERAL INSTRUCTIONS FOR COMPLETING THE SELF-STUDY REPORT

The material contained in the Evaluation Instrument is to be used for the evaluation conducted by each school. The completed report becomes the Self-study Report. The following general instructions will assist in completing the report:

1. Appoint Coordinating Committee and Study committees.

Information regarding appointment of the Coordinating Committee and the study committees is provided on page x.

2. Study instructions for completing each section of the Self-study Report.

Specific instructions for completing each section of the Self-study Report are provided immediately following the respective title pages.

3. Distribute appropriate materials to study committee members, faculty, and staff.

Each study committee member and all teachers should be given the following:

- a. A copy of the appropriate section from the Self-study Report.
- b. The appropriate instructions for completing the section.

4. Instructions for developing improvement action plans.

The Coordinating Committee, in consultation with all faculty, staff, and study committees, will develop action plans for significant areas of needed improvement. The action plans include (1) action steps, (2) a time line for implementation, (3) an estimate of necessary resources (financial, human, educational, etc.), and (4) the person(s) responsible for each action. Specific instructions, sample action plans, and action-plan forms are included in the Self-study Report.

5. Gather supplementary materials to be provided for the Visiting Committee.

Gather the supplementary materials listed on the next page. Place the materials in the Visiting Committee workroom.

INSTRUCTIONS FOR SCHOOL PROFILE, PROGRESS REPORT, AND PHILOSOPHY AND GOALS

The principal, with assistance from the Coordinating Committee, is responsible for completing this section.

Items A Through I

The principal may delegate to others responsibility for completing applicable sections. For example, he or she could delegate to the librarian, with the support of the Self-study Committee for the media center, the responsibility for completing Section D.

For Section E, #3, Staff Data (page 10)—The ratio of students to FTE instructional staff should be obtained using the following formula: Divide the total number of students by the total full-time equivalent (FTE) instructional staff. (For example: 36 students divided by 1.5 FTE staff results in a ratio of 24 to 1.)

Progress Report

The principal is responsible for completing the progress report based on input from the faculty, staff, and local governing board. The local governing board will approve the completed report.

1. The progress report responds to the action plans and recommendations from the previous evaluation visit, interim review, and/or revisit reports.
2. Under the proper heading, list each recommendation and action taken showing the date of completion. Be specific about the action and supply supporting evidence when applicable. Follow the sample format outlined on page 18.

Philosophy, Goals, and School Mission

The philosophical foundation Study Committee is responsible for completing this section and standards 1-10, in cooperation with the local governing board, administration, faculty, and staff.

An Adventist system-wide statement of philosophy is included in this evaluation instrument. There are also school-wide goals for student learning adopted by the NAD education system. These goals have been adapted from *Journey to Excellence*.

The local governing board, administration, faculty, and staff will review and reaffirm the philosophy, mission statement, and curriculum goals. The school's statement of mission and unique goals for student learning will be added to the system-wide statements.

PROGRESS REPORT

Instructions:

The previous Visiting Committee Report(s)—full evaluation visit, interim review, and/or revisit—are to be used as the basis for the Progress Report. This report states progress in implementing all improvement action plans and the recommendations in each area of the previous Visiting Committee Report(s). Use the accompanying table to report on action plans. For recommendations, state the specific action that has been taken with supporting evidence/information, where applicable, and give the date of fulfillment. (See samples at www.nadeducation.adventist.org)

School Standards—Curriculum and Instruction

Recommendation #2:

That the administration and faculty develop strategies to coordinate curriculum content and skill development across all grades. (Self-study, p. 29; Interview)

School Response:

During the past three years we have been in-serviced in using the curriculum mapping strategies developed by Heidi Hayes Jacob to articulate the key learnings being taught in each grade. This allowed us to communicate clearly with parents about student learning goals, ensure the curricular alignment with denominational learning goals, reduce some redundancies, and identify areas where we could integrate instruction between some subjects.

(Implemented: August 1999–May 2002)

PHILOSOPHY AND GOALS

A. Introductory Statement

A statement of philosophy has been developed for schools operating in the Seventh-day Adventist education system. Curriculum goals and objectives consistent with the philosophy have also been established. Additional goals that meet concerns and needs of the constituency, students and families, should be added. The philosophy and goals should be systematically reviewed by the constituency, administration, faculty, staff, and local governing board. There should be an annual evaluation of continuous progress toward these goals.

B. Statement of Philosophy

The Seventh-day Adventist Church recognizes God as the ultimate source of existence and truth. In the beginning God created in His image a perfect humanity, a perfection later marred by sin. Through the guidance of the Holy Spirit, God's character and purposes can be understood as revealed in nature, the Bible, and Jesus Christ. The distinctive characteristics of Adventist education, derived from the Bible and the inspired writings of Ellen G. White, point to the redemptive aim of true education: to restore human beings into the image of their Maker.

While God presents His infinitely loving and wise character as the ultimate norm for human conduct, human motives, thinking, and behavior have fallen short of God's ideal. Education in its broadest sense is a means of returning human beings to their original relationship with God. Its time dimensions span eternity.

Adventist education seeks to develop a life of faith in God and respect for the dignity of all human beings; to build character akin to that of the Creator; to nurture thinkers rather than mere reflectors of others' thoughts; to promote loving service rather than selfish ambition; to ensure maximum development of each individual's potential; and to embrace all that is true, good, and beautiful.

An education of this kind imparts far more than academic knowledge. It fosters a balanced development of the whole person—physically, intellectually, socially, and spiritually. Working together, homes, schools, and churches cooperate with divine agencies in preparing learners for responsible citizenship in this world and in the world to come.

PHILOSOPHY AND GOALS *(continued)*

D. Seventh-day Adventist Curriculum Goals

The following goals have been developed to support the unique philosophy of Seventh-day Adventist education. (Taken from *Journey to Excellence*.)

	Each student will:
1. Acceptance of God	Surrender one's whole life to God, develop a relationship with Jesus Christ, and allow the Holy Spirit to work in one's life.
2. Commitment to the Church	Desire to know, live, and share the message and mission of the Seventh-day Adventist Church.
3. Interpersonal Relationships	Develop a sense of self-worth, skills in interpersonal relationships, an understanding of the responsibilities of family membership, and the ability to respond with sensitivity to others' needs.
4. Responsible Citizenship	Develop an understanding of cultural and historical heritages; affirm a belief in the dignity and worth of others; and accept responsibility for local, national, and global environments.
5. Healthful, Balanced Living	Accept personal responsibility for achieving and maintaining optimum physical, mental, and spiritual health.
6. Intellectual Development	Adopt a systematic, logical, and biblically based approach to decision making and problem solving when applied to a developing body of knowledge.
7. Communication Skills	Recognize the importance of effective communication and develop the requisite skills.
8. Personal Management	Function responsibly in the everyday world using Christian principles of stewardship, economy, and personal management.
9. Aesthetic Appreciation	Develop an appreciation of the beautiful, both in God's creation and in human expression, while nurturing individual ability in the fine arts.
10. Career and Service	Develop a Christian work ethic with an appreciation for the dignity of service.

EVALUATIVE CRITERIA for Seventh-day Adventist Schools, Grades Pre K-10

INSTRUCTIONS FOR EVALUATING SCHOOL STANDARDS

Standards Assessment:

Each statement is a standard of quality that must be met in all Seventh-day Adventist schools. Study committees of 3 to 5 members are to be appointed to complete one or more standards.

The Study Committee, as a group, is to evaluate each standard and associated indicators of implementation then determine by consensus the extent to which the statement is addressed. The number in the rating scale that best describes the present practice should be circled.

- 1—The standard/indicator of implementation is not met.
- 2—The standard/indicator of implementation is partially met.
- 3—The standard/indicator of implementation is met.
- 4—The standard/indicator of implementation is exceptionally met.

After selecting the number that best describes the standard and indicators of implementation, the study committee is to write a verification narrative statement for that standard.

All Improvement Action Plans

When the study committee identifies needed significant improvement in a standard, a recommendation for possible development of an action plan should be made to the Coordinating Committee.

Copy this page and the Criteria for Accreditation (pages vi, vii) for each Study Committee working on standards.

STANDARDS FOR SEVENTH-DAY ADVENTIST K-10 SCHOOLS

Standards are ideals for quality schools that are specific, attainable, and measurable. The following standards are to be met in all Seventh-day Adventist schools. Included with the standards are indicators of implementation that identify the degree to which the standard has been effectively attained.

The appropriate study committee is to evaluate each standard statement and the indicators of implementation to determine, by consensus, the extent to which each has been attained. After determining the rating for each standard and related indicators of implementation, the study committee is to rate the overall standard based on all available information. The Study Committee is to then write a short narrative for each standard describing the school’s program in relation to the standard to corroborate the chosen rating.

1. Standard for the Philosophical Foundation

INSTRUCTIONS FOR EVALUATING SUBJECT AREAS & PRE-KINDERGARTEN CLASSROOMS

The following steps will guide the teachers in completing the subject-area and pre-kindergarten sections.

Materials needed for each teacher:

1. This page of instructions.
2. Teacher Instructional Profile
* Each teacher will complete a set of general questions regarding the instructional program in brief narrative responses.
3. The assigned subject-area/early childhood sections, i.e., Kindergarten and Pre-kindergarten.

Instructions for each section (A–E) in the subject areas:

- A. **Introductory Statement:** A general statement about the subject area and its purpose and relevance within the Adventist curriculum is provided.
- B. **Instructional Goals:** The instructional goals, synthesized from the NAD curriculum guides, have been provided for each subject area. Teachers may include additional goals for specific or unique aspects of the instructional program.
- C. **Instructional Assessment:** This series of questions will be used to determine the effectiveness of the instructional program in the subject area. The teacher is to provide the information requested in brief narrative responses.
- D. **Evaluation:** Three summative statements provide the teacher an opportunity to highlight the strengths of the instructional program in this specific area and to cite evidence of student learning.
- E. **Recommendations for Improvement:** The teacher is to recommend improvements to the instructional program in this subject area. Some of these recommendations may be used by the Coordinating Committee to develop action plans.

The completed subject-area sections will be submitted to the Coordinating Committee.

FINE ARTS

A. **Introductory Statement**

To study art is to experience the universal language of emotions, experiences, and ideas that knows no boundary of time, culture, or geography. Art is offered to help students develop an appreciation for aesthetic beauty, diversity, and creative expression. It gives students an opportunity to develop and express their own creative/artistic abilities.

“The Author of all beauty, Himself a lover of the beautiful, God provided to gratify in His children the love of beauty”—Ellen G. White, *Education*, p. 41.

B. **Instructional Goals**

The art program will assist the students to:

1. Recognize their unique artistic talents and create a desire to use them to serve and glorify the Creator God.
2. Develop an aesthetic and conceptual understanding of God’s creation and human expression.
3. Value art as a means of self-expressive communication with God and others.
4. Develop observational/perceptual skills and heighten sensory awareness.
5. Develop the ability to make aesthetic judgments by critiquing works of art and music.
6. Encourage a sense of self-worth in a creative environment.
7. Develop confidence in their artistic skills and abilities.
8. Cultivate an awareness and appreciation of the arts in various cultures and historical periods.
9. Exhibit a fundamental knowledge of art history and aesthetics.
10. Understand and exhibit safe practices in art production.
11. Experience the use of technology in creative expression.
12. Acquire a knowledge of career opportunities in art.
13. Participate with increasing skill in fine arts experiences consistent with Christian principles.

14. Develop spirituality by supporting their understanding and relationship with a God of beauty and inspiration.
15. Develop an appreciation for the influence of the arts on society and their personal lives.
16. Learn to use discriminate criteria in selecting music for personal enrichment.

Art (continued)

C. Instructional Assessment (Grades 1-8)

1. How are student's artistic endeavors in both art and music displayed or exhibited?

2. What provision is made for individual expression in art and music?

3. Describe various experiences included in the instructional program for art.

4. Describe various experiences included in the instructional program for music.

5. Explain how God's love of beauty and order is conveyed to students through the study of fine arts.

6. How are the fine arts used to enhance the worship experience of students?

BUSINESS/COMPUTER EDUCATION

A. Introductory Statement

Training in computer technologies and business education is essential to success in many aspects of life in the changing world of the 21st century. Principles of Christian stewardship, service, and decision making are infused into a curriculum of skill development that prepares students for life and successful careers. The “head-heart-hand” characteristics of business and computer education give it potential for inculcating traits, qualities, and truths that affect the learner for life.

B. Instructional Goals

The business/computer education program will assist students to:

1. Understand the application of Christian principles and ethics in business and in the use of computer technology.
2. Acquire an understanding of the importance of Christian stewardship, philanthropy, and personal economy in the management of personal resources.
3. Explore the use of technology in sharing the basic tenets of the Seventh-day Adventist Church.
4. Enhance confidence in decision making, project development, and problem solving using computer technology.
5. Develop initiative, good judgment, and proper work habits in business/computer projects.
6. Acquire competency in the use of basic computer applications/programs.
7. Develop basic keyboarding skills and efficient use of computer peripheral equipment.
8. Understand the role and function of computer technology in various aspects of society.
9. Experience the use of technology in creative projects and commercial productions.
10. Acquire a knowledge of career opportunities in business and fields using computer technology.

C. Instructional Assessment (Grades 1-8)

1. How are students made aware of ethical obligations and legal responsibility related to the use of computers, software, and the Internet?
2. List opportunities given to students to apply computer skills in other instructional areas.
3. How does the instructional program teach proper keyboarding techniques?
4. Describe the use of software applications in the instructional program (i.e., word processing, spreadsheets, PowerPoint).

What has been the average annual expenditure for computer equipment/material in the past two years?

MATHEMATICS

A. **Introductory Statement**

Mathematics education should equip students with essential skills for making the many mathematic computations and applications of math concepts necessary for living in our technological society. Mathematics instruction must assist students in developing analytical and critical-thinking skills. Opportunities should also be provided for students to discern the mathematical patterns the Creator has given in nature, thus increasing appreciation for its beauty, order, and symmetry.

B. **Instructional Goals**

The mathematics program will assist the students to:

1. Gain an understanding and appreciation for the Creator God, who is orderly, precise, and infinite.
2. Develop an appreciation for God's faithfulness and dependability as illustrated in the constancy and predictability of mathematical rules.
3. Understand the importance of Christian principles and ethics in mathematical applications.
4. Acquire skill and confidence in performing, communicating, and connecting mathematical concepts.
5. Develop competency in the use of mathematical terms and in measurement skills.
6. Learn to collect, process, properly represent, and interpret statistical data and information.
7. Develop analytical-reasoning, critical-thinking, and problem-solving skills.
8. Acquire skills in selecting and using appropriate technology in mathematics problem solving.

C. Instructional Assessment (Grades 1-8)

1. Describe the processes used to assess student ability for placement, instruction, and mastery.
2. What provision is made for reinforcement and evaluation?
3. Explain the instruction process used in the introduction of new concepts.
4. Describe the techniques employed to move students from concrete to abstract concepts.
5. What opportunities are given for students to appreciate the Creator as a God of order?
6. Give examples of the use of technology to enhance and support instruction.
7. Describe the opportunities for students to develop critical-thinking skills and apply math concepts to daily life.

What funds have been spent for math instructional materials during the past two years?

MODERN LANGUAGES

A. **Introductory Statement**

Because of the communication links, global transportation systems, and global economy that have developed in our modern world, it is essential that students acquire the ability to understand and communicate effectively with peoples of other cultures and languages. The modern language curriculum will help students develop these skills and abilities. The Seventh-day Adventist Church is an international church with a global mission of sharing the gospel; thus, it is imperative that the study of modern languages be an integral part of the curriculum.

B. **Instructional Goals**

The modern language program will assist students to:

1. Develop the communication skills of listening, speaking, reading, and writing a modern language.
2. Enhance intellectual acuity for learning in all disciplines and improve social sensitivity.
3. Foster the development of an attitude of inquiry into the concepts, values, and worldview of other people and cultures.
4. Acquire a broader understanding and appreciation for the literature and arts of other cultures and language groups.
5. Develop a desire for language proficiency and linguistic ability that will encourage lifelong learning in languages.
6. Understand the importance of personal involvement in carrying out the gospel commission and being equipped for effective witness/service in an international church.
7. Engender additional employment opportunities, local and international, through the development of modern language skills.
8. Assist in preparing for higher education by accomplishing a common graduation requirement and college/university entrance prerequisite.

Modern Languages (*continued*)

C. Instructional Assessment (Grades 1-8)

1. Briefly explain the scope and sequence of modern language instruction.

2. Describe opportunities provided for students to experience, practice, and use modern languages.

3. What authentic materials and artifacts from target cultures are used to enhance the modern language instructional program?

4. How does the modern languages program foster an appreciation for cultural and ethnic diversity?

5. How is technology used to support modern language instruction?

The following materials and equipment are available and used:

	YES	NO
1. Audiovisual equipment and supplies	_____	_____
2. Dictionaries/reference materials	_____	_____

MUSIC

A. **Introductory Statement**

The impact of music on individuals and society necessitates assistance to students in developing a value system to guide them in making good judgments about choices in music. The music program should help students understand, appreciate, create, evaluate, and discriminate in a variety of musical experiences. As a gift from the Creator God, music that is aesthetically pleasing and spiritually inspiring should be the focus of music education in Seventh-day Adventist schools.

B. **Instructional Goals**

The music program will assist students to:

1. Enhance their spiritual development by supporting their understanding of and relationship with a God of beauty and inspiration.
2. Participate with increasing skill in musical experiences consistent with Christian principles.
3. Develop an aesthetic awareness of melody, harmony, and rhythm.
4. Acquire an understanding of the basic elements of music theory and techniques.
5. Develop skills and technical proficiency in musical performance as a means of self-expression.
6. Cultivate an awareness and appreciation of music from various cultures and historical periods.
7. Develop an appreciation for the influence of music on society and in their personal lives.
8. Learn to use discriminating criteria in selecting music for personal enrichment.

Music (continued)

C. Instructional Assessment (Grades 1-8)

1. Describe the variety of music experiences that are provided for students.

2. What opportunities are provided for the students to develop discrimination in the choice of music?

3. How is a lifelong appreciation of music fostered?

4. Describe ways in which the music program is used to benefit the school, church, and community.

PHYSICAL EDUCATION

A. **Introductory Statement**

Because physical fitness and health are vital to the development of the body, mind, and spirit, the physical education program is very important in a Seventh-day Adventist school. As an integral part of the education of all students, physical education should be enjoyable and success oriented. The program should assist students to develop knowledge, attitudes, and skills that will result in practices and attitudes necessary to maintain lifelong physical, social, emotional, and mental health.

B. **Instructional Goals**

The physical education program will assist students to:

1. Enhance their understanding of God as the Creator and Sustainer of life and health.
2. Develop a realization that responsible Christian stewardship includes maintaining physical health.
3. Experience physical skill development and activities that contribute to lifelong participation in physical activities.
4. Pursue the highest level of fitness/wellness for success in work and play, creating strong sense of well-being.
5. Develop positive self-worth and personal potential through active physical exercise and sports.
6. Understand the importance and balance of independent and cooperative teamwork in physical activities, identifying the importance of cooperation.
7. Demonstrate increasing physical agility, balance, coordination, efficiency, and flexibility.
8. Develop improved muscle tone, strength, and endurance.
9. Acquire qualities necessary for good sportsmanship and teamwork, such as self-control and respect for others.
10. Demonstrate a knowledge of rules and strategies commonly practiced in a wide variety of individual and group activities/sports.

C. Instructional Assessment (Grades 1-8)

1. What aspects of the curriculum provide students with knowledge and skills to pursue lifelong recreational activities and healthful living?
2. How does the physical education program differ from recess?
3. What strategies are used to ensure that all students actively participate in physical education?
4. Cite evidence that age-appropriate activities are used to ensure student safety.
5. How are cooperation and team effort incorporated into the instructional program?
6. Describe strategies that convey to students the value of physical activity and that promote teamwork, cooperation, and the development of lifelong healthful practices.

RELIGION AND WITNESSING/SERVICE

A. Introductory Statement

“The science of redemption . . . is the highest study in which it is possible for man to engage.”—Ellen G. White, *Education*, p. 126. The sourcebook for this study is the Word of God—the Bible. The study of God’s Word is central to the mission of Seventh-day Adventist Christian education and, as such, is central to the curriculum. The instructional program for religion is designed to help students know God so they will respond with love, trust, and obedience to Him. They will understand the science of salvation, accepting God’s saving grace through Jesus Christ, and make Him the focal point of their lives.

Students will be led to understand and endorse the teachings of the Seventh-day Adventist Church and accept the commission of Jesus to witness for Him in their daily lives. “True education means more than the perusal of a certain course of study. . . . It prepares the student for the joy of service in this world and for the higher joy of wider service in the world to come.”—Ellen G. White, *Education*, p. 13.

B. Instructional Goals

The religion program and witnessing/service experiences will assist students to:

1. Understand and appreciate the workings and purposes of the Trinity: God the Father, the Son, and the Holy Spirit.
2. Recognize the authenticity and authority of the Bible as a primary source of knowledge about the Creator God.
3. Develop an understanding that the purpose of Bible study is to become more like God—opening oneself to the influence of His Spirit.
4. Recognize that God has created a universe and humankind on earth with the privileges and responsibilities of free will and personal choice.
5. Develop an understanding of the great rebellion of Satan and its effects on the universe and God’s love in providing a plan of redemption.
6. Become a committed, loyal, loving Seventh-day Adventist Christian through Bible study, prayer, and group interaction.
7. Understand and accept the role of the prophetic gift as evidenced in Scripture and in the writings of Ellen G. White.

Religion and Witnessing/Service *(continued)*

8. Develop a personal sense of mission, understanding that sharing one's faith is a natural outgrowth of acquiring the knowledge about and entering into a relationship with the loving God.
9. Identify the spiritual, physical, intellectual, and emotional needs of others and respond with loving care and courtesy.
10. Develop a lifestyle of witnessing and assume personal responsibility for helpful service in the home, school, church, and community.

C. Instructional Assessment (Grades 1-8)

1. Describe how the Bible is used as a primary source of spiritual knowledge and insight.
2. Explain the use of Ellen G. White writings to expand biblical concepts, principles, and events.
3. What opportunities are provided for students to express personal belief in and commitment to Jesus Christ?
4. Describe the activities designed to assist the students in personal spiritual growth.
5. How is the uniqueness of the Adventist message emphasized in the instructional program?
6. List activities provided to encourage student interest and participation through witnessing and service opportunities.

SCIENCE

A. **Introductory Statement**

An understanding of science fosters in students an increased understanding of God's creative and sustaining power. True science is a revelation of the character of God. It is essential that students acquire a knowledge of basic scientific principles and their effect on the quality of spiritual, social, moral/ethical, and economic life. The science curriculum and instruction program includes fundamental science concepts, the application of scientific methods of inquiry in laboratory experiences, and problem-solving skills—all skills that are essential for understanding our modern scientific/technological society and the awesome wonders of God's creation.

B. **Instructional Goals**

The science program will assist students to:

1. Develop an appreciation for the study of science as a means of learning about God as Designer, Creator, and Sustainer of universal natural laws.
2. Understand the importance of exercising faith in relating scientific data to the Scriptures and other inspired writings.
3. Acquire knowledge of biological, physical, earth, and health sciences consistent with their level of readiness.
4. Extend their understanding of processes, concepts, generalizations, and unifying principles through guided study, research, and laboratory/field activities.
5. Develop fundamental skills in basic scientific methods—gathering, organizing, interpreting, and communicating scientific information.
6. Recognize the relationships of science, technology, and society, evaluating their potential for good and the limitations of each.
7. Develop proficiency in critical and creative thinking and applying problem-solving strategies to everyday situations and problems.
8. Establish a framework of Christian principles for responsible stewardship of natural resources and personal health.
9. Recognize ethical applications of scientific knowledge and the importance of critical analysis in considering conflicting ideas and concepts.
10. Evaluate interests, aptitudes, and abilities necessary for career opportunities in science.

C. Instructional Assessment (Grades 1-8)

1. What opportunities are provided for students to acknowledge God as the Creator?
2. What opportunities are provided for students to engage in scientific inquiry and exploration?
3. Describe the types of hands-on activities and laboratory experiences used to enhance learning.
4. Give examples of how technology enhances and supports instruction.

SOCIAL STUDIES

A. Introductory Statement

The social studies program in Seventh-day Adventist schools is designed to emphasize the theme of God's guiding hand in history and His loving concern for humanity. It endeavors to give students an opportunity to develop an appreciation for the biblical concepts of human worth and the value of service to humanity. Social studies acquaints students with the contributions of different cultures to the developing story of humankind and encourages them to become responsible citizens.

B. Instructional Goals

The social studies program will assist the students to:

1. Develop an understanding of the origin, nature, purpose, and destiny of humanity based on a Seventh-day Adventist worldview.
2. Acquire a knowledge of factual historical information and recognize the relevance of historical events to civilization throughout the ages.
3. Recognize God's purpose for people and nations by relating history with Bible prophecy.
4. Analyze, evaluate, and apply information gained through the use of a variety of research and study skills.
5. Communicate historical information and interpretations effectively.
6. Demonstrate the skills essential to effective social interaction and cooperation with others.
7. Develop a personal system of ethics for responsible citizenship based on integrity, morality, and personal responsibility.
8. Recognize the value of patriotism and accept the privilege of serving others through the rights and responsibilities of citizenship.
9. Develop the judgment, perspectives, and analytical skills that are essential for a productive citizen participating in a contemporary society.
10. Develop a value system based upon respect for human and civil rights, religious tolerance, and multicultural understanding.

PRE-KINDERGARTEN

A. Introductory Statement

Attention to pre-kindergarten children is imperative to the foundation of a child's character development and success.

The Seventh-day Adventist pre-kindergarten offers an opportunity for four-year-olds to extend their learning experience in a developmentally appropriate classroom. Based on their age, individual levels and learning styles, such an informal environment fosters natural curiosity and stimulates their cognitive, physical, social, emotional and spiritual growth.

B. Instructional Goals

The fundamental goal of the Seventh-day Adventist pre-kindergarten program is to encourage young children to develop their relationship with God through a safe, interactive, Christ-centered environment. In this environment they are stimulated to observe, explore, think, discover, experiment, speak, manipulate, model and create. The pre-kindergarten program will be reflected in the following goals.

1. Spiritual - The students will:

KINDERGARTEN

A. Introductory Statement

The early years are critical in the life of the child and form the basis for character development and success in later formal education. Emphasis should be placed on surrounding the young child with a rich experiential environment.

Seventh-day Adventist kindergartens offer a transitional experience that extends the home and early childhood programs into the elementary school. As such, it provides a flexible program that considers the developmental stages of children as well as individual differences.

B. Instructional Goals

The primary goal of the Seventh-day Adventist school kindergarten program is to acquaint young children with God through a combined study of nature and the Scriptures. In this environment they are stimulated to observe, explore, think, discover, experiment, speak, manipulate, model, and create. The prescribed kindergarten program will be reflected in the following goals:

1. Spiritual—The students will:
 - a. Accept the Bible as God's Word to them.
 - b. Worship God with joy and reverence.
 - c. Know Jesus as a personal Friend.
 - d. Recognize their value as children of God.
 - e. Develop Christ-like characters.

 - c. Participate in a variety of activities.
 - d. Perform various classroom responsibilities.
 - e. Respond to their teachers and peers in an appropriate manner.
 - f. Develop self-control, respect for others, a willingness to share, and a sense of fair play.
 - g. Demonstrate a willingness to try new experiences.
 - h. Develop self-reliance.
 - i. Use communication skills for effective interaction.
 - j. Show respect for property.
 - k. Appreciate the value of friendship.

3. Cognitive—The students will:
 - a. Attend to and complete tasks.
 - b. Develop problem-solving skills.
 - c. Exhibit appropriate communication skills.
 - d. Show an active interest in their environment and an eagerness to learn.
 - e. Apply reasoning from cause to effect in their behavior.

4. Physical—The students will:
 - a. Participate in both indoor and outdoor physical activities.
 - b. Increase both fine and gross motor skills.
 - c. Demonstrate safe practices in their total environment.
 - d. Show increased awareness and practice of health habits.

LANGUAGE ARTS AND READING

(Grades 1-8)

A. Introductory Statement

The ability to listen, speak, read, and write with ease and accuracy is essential for learning and living. The study of language arts and reading is basic to the educational program. It provides students the opportunity to develop thinking processes and communication skills. Seventh-day Adventist education recognizes these basic skills as essential for productive citizenship and for comprehending and sharing the good news of salvation with others.

As reading competency is developed, the individual's recognition of reading as a valuable source of knowledge, pleasure, and spiritual growth should also increase. What one reads should provide a better understanding of one's relationship and responsibility to God and to humanity.

B. Instructional Goals

The language arts/reading program will assist students to:

1. Develop optimum reading skills to facilitate reading for learning and pleasure.
2. Become discerning/discriminating readers, identifying quality literature in harmony with Christian principles.
3. Develop perception and sensitivity through literature that portrays the beauty of language.
4. Enhance their understanding of God, others, and self through experiences in literature.
5. Listen and observe purposefully for the acquisition, interpretation, and evaluation of information.
6. Communicate ideas clearly, accurately, and effectively in written and spoken language.
7. Write for practical, creative, and aesthetic purposes with clarity and precision.
8. Speak effectively when addressing various audiences, under varying circumstances, and for different purposes.
9. Acquire the essential language and study skills essential to functioning as a productive citizen in the church and in society.
10. Develop analytical-thinking and evaluation skills for selecting media suitable for learning and/or personal enjoyment.

Language Arts/Reading (Grades 1-8) (continued)

C. Instructional Assessment

1. How is the NAD-adopted reading program used in the instructional program?
2. Describe the processes used to assess student ability for placement, instruction, and mastery.
3. What provisions are made to accommodate the levels of student learning and comprehension within and across grade levels?
4. How is instruction of spelling and handwriting integrated into the language arts program?
5. Give examples of how the instruction of reading and writing includes a variety of genre.
6. What opportunities are given to students for the practice of listening and speaking skills in a variety of settings?
7. Describe what strategies are employed for teaching reading across the curriculum.
8. In the selection of supplementary materials, what criteria are applied that show a sensitivity to Adventist values and diversity?
9. What motivational techniques are employed to encourage students to become lifelong readers for pleasure?

The following materials and equipment are available and used in the language arts/reading program:

	Yes	No
1. Handwriting charts/wall strips	_____	_____
2. Grade-level appropriate dictionaries	_____	_____
3. Thesauruses	_____	_____

ENGLISH **(Grades 9-10)**

A. Introductory Statement

The development of language skills provides a vehicle for effective communication that enhances one's relationship with God and with others. It provides the avenue through which one person may affect another in spiritual growth and social interaction. English instruction should develop proficiency in writing, listening, speaking, reading, and viewing, all of which promote intellectual and spiritual development. Students will become effective communicators—confidently using language to express themselves, to acquire new information, and to interact effectively with others.

B. Instructional Goals

The English program will assist students to:

1. Develop a lifelong love for reading literature, enhancing their understanding of God, others, and themselves.
2. Become discerning/discriminating readers, identifying quality literature in harmony with Christian principles.
3. Develop perception, sensitivity, and an appreciation for the beauty of language and literature and its significant contribution to the human experience and imagination.
4. Internalize Christian values and recognize that they should characterize all communication.
5. Listen and observe purposefully in acquiring, interpreting, and evaluating information.
6. Communicate ideas clearly, accurately, and effectively in written and spoken language.
7. Write for practical, creative, and aesthetic purposes with clarity and precision.
8. Speak effectively when addressing various audiences, under varying circumstances, and for different purposes.
9. Acquire the essential language and study skills essential to functioning as a productive citizen in the church and society.
10. Develop analytical-thinking and evaluation skills for selecting media (television, film, videotapes, audiotapes, CDs, printed material) suitable for learning and/or personal enjoyment.

HEALTH EDUCATION

(Grades 9-10)

A. Introductory Statement

Health education in Seventh-day Adventist schools emphasizes concepts necessary for the development of dynamic Christ-centered personalities, creative minds, and physically fit bodies. The values and lifestyle that students choose as adolescents will influence their health, or state of wellness, throughout their life. Wellness includes the nurture of sound mental and physical health, the development of stable social relationships, and the fostering of spiritual growth and maturity.

B. Instructional Goals

The health education program will assist students to:

1. Gain a knowledge of the biblical and scientific principles of healthful living.
2. Understand how personal health influences the quality of one's relationships with God and with others.
3. Accept biblical and scientific principles of healthful living.
4. Implement/demonstrate an understanding of how to apply personally the biblical and scientific principles of healthful living to their own life choices and habits.
5. Acquire skills essential to personal wellness, successful family membership, and effective community witness/service.
6. Identify community health resources.
7. Explore health-related career opportunities.

HOME ARTS/CONSUMER SCIENCE

(Grades 9-10)

A. Introductory Statement

Seventh-day Adventist schools include instruction in home arts, family, and consumer science because healthy, stable families are essential for optimum personal development, a productive society, an effective church program, and demonstrating God's love in relationships. Effective instruction should assist the students to develop an appreciation and understanding for managing life's personal choices, finances, and interpersonal relationships in a manner that positively impacts their life's goals and resources for food, clothing, housing, service to God, and leisure activities.

B. Instructional Goals

The home arts/consumer education program will assist students to:

1. Acknowledge the sacredness of human life and the responsibility of each student to develop a lifestyle that will maintain optimum physical, mental, and emotional health.
2. Create and maintain Christian living environments that permit the harmonious development of personal spiritual maturity and positive interpersonal relationships.
3. Learn to identify and use the available resources to improve home life and meet basic human needs of safety, food, and shelter.
4. Understand the value of maintaining a personal lifestyle of simplicity and service in human relationships as a means to demonstrate eternal values.
5. Acquire the basic knowledge and skills needed for effective home management and maintenance and for wise consumer practices.
6. Explore the opportunities for service in careers related to the home arts, family, and consumer sciences.

TECHNOLOGY EDUCATION

(Grades 9-10)

A. Introductory Statement

Adventist schools include instruction in practical arts and industrial-technology skills. Technology education plays an important role in preparing youth to live and work successfully in a fast-changing society. Technology education also provides skills that can be used to find entry-level jobs and equip students for Christian witnessing/service. In Adventist schools technology education, with its “head-heart-hand” characteristics and practical skill development, has the potential to inculcate traits, qualities, and truths that will affect the student for life.

B. Instructional Goals

The technology education program will assist students to:

1. Develop an awareness of technological processes, the use of resources, and the impact of one’s technological activities on the environment and society.
2. Identify, evaluate, select, and use technological resources in practical situations.
3. Demonstrate the ability to work productively, safely, and cooperatively with others.
4. Develop the skills to process resources to meet job specifications and production goals.
5. Understand the importance of developing skills that can be utilized to enhance and support a personal involvement in Christian service projects.
6. Explore the opportunities for service in careers requiring skills in technology.

INSTRUCTIONS FOR ADMINISTERING STUDENT SURVEY

The Study Committee assigned to complete the standards for student activities and student services should also oversee the administration of the Student Survey. Follow these instructions:

Administration of Student Survey

The Student Survey is to be administered to students in grades 5-10. Students absent on the day of administration do not need to be surveyed upon their return. It is recommended that one person distribute, supervise, and collect the surveys. This will provide continuity in presenting the purpose and rationale for the survey to students as well as consistency in administration.

In consultation with the local conference office of education, the principal and/or Study Committee may add questions that would be useful in assessing the quality of locally developed programs and initiatives.

Tabulation of Responses to the Student Survey

1. Tabulation of the responses on the survey will be reported on the form provided.
2. Reporting the responses to survey items 1-31 will be done using a calculated percentage of total responses on each item.
3. The written responses will be collated and transcribed verbatim on separate pages by category.
4. Include the Student Survey Tabulation in the Self-study Report.

INSTRUCTIONS FOR ADMINISTERING PARENT SURVEY

The Study Committee assigned to complete the standards for Student Activities and Student Services should also oversee the administration of the Parent Survey. Follow these instructions:

Administration of Parent Survey

The Parent Survey is to be sent to all parents of all students. An accompanying letter from the principal should indicate the purpose of the survey as an integral part of the school evaluation process and solicit full participation. The letter should also instruct the parents to return the completed survey sealed in an enclosed envelope to the school.

The sealed surveys are to be given to the Visiting Committee chair, who will oversee their review. A report of Parent Survey responses will be provided to the school by the Visiting Committee.

Tabulation of Responses to the Parent Survey:

1. Tabulation of the responses to the survey will be reported on the form provided.
2. Reporting the responses to survey items 1–12 will be done using a calculated percentage of total responses on each item.
3. The written responses will be collated and transcribed verbatim on separate pages by category.

SCHOOL-WIDE IMPROVEMENT ACTION PLANS

Instructions for Developing School-wide Improvement Action Plans	138
Improvement Action Plan Template	139
Samples of School-wide Improvement Action Plans	140

EVALUATIVE CRITERIA for Seventh-day Adventist Schools, Pre-K-10

INSTRUCTIONS FOR DEVELOPING SCHOOLWIDE-IMPROVEMENT ACTION PLANS

School-wide improvement action plans are a vital outcome of the evaluation process. The development of action plans provides the school an opportunity to transform its vision of excellence into strategic-improvement action steps for introducing change and creating a higher level of accountability. Action plans will be created in significant school-wide areas that need improvement.

A school-wide improvement action plan is a detailed description of a strategic initiative. It includes a clear objective, action steps for implementing the plan, a time line, an estimate of necessary resources (financial, human, educational, etc.), and the person(s) responsible for completing each step. Action-plan forms are included in the Evaluation Instrument.

All school-wide-improvement action plans will be drafted by the Coordinating Committee and approved by the local governing board. Action plans will be based on identified needs of the school program that have been included in the completed Self-study Report sections. This information includes the student and parent surveys. The identified needs will also be reported in the recommendations made by Study committees and/or school personnel.

Procedures for Developing School-wide- Improvement Action Plans

- A. The Coordinating Committee will do the following:
 1. Develop all school-wide-improvement action plans with a clearly stated and measurable objective. Suggestions for improvement from the subject areas will be included under the Standard for Curriculum and Instruction.
 2. Identify and develop a reasonable number of achievable, specific action plans produced by the self-study process.
 3. Use the action-plan forms included in the Evaluation Instrument (one form for each plan) and complete each draft plan, fully identifying the action steps to be taken, the responsible person(s), a time line for implementing, and estimated resources required.
 4. Ensure that the principal/head teacher and faculty review all draft action plans before sending them to the local governing board for review and approval.
 5. Submit final drafts of all action plans to the local governing board for approval.
 6. Include all school-wide-improvement action plans as the final section of the Self-study Report.

School-wide-IMPROVEMENT ACTION PLANS *(continued)*

- B. The local governing board will approve all school-wide-improvement action plans prior to their inclusion in the Self-study Report.

Action Plan #	Person(s) Responsible	Action Steps	Date/Time Line	Estimated Resources
51	Admin & staff	Continue to look for and develop ways to achieve this standard. Specifically see the whole and not just the departmental goals for students. <hr style="width: 50%; margin: 5px 0;"/> <i>This is a poorly worded plan. The objective does not indicate who is leading the staff to achieve the standard.</i> <i>The action step is only to “look for . . . ways” when it should provide a list of activities with time lines and estimated resources for each. This action plan needs much more detail.</i>
