

Cooperative Learning (3 students)

Materials: blue clay, green clay, white clay, Styrofoam ball, two rolling pins, plastic spoon, craft stick

Person 1: You will need to gather all the materials for the group and cut the pieces out of the green and white clay.

Person 2: You will roll out the blue and green clay for the earth.

Person 3: You will use the clay and cover the styrofoam ball.

Directions: Take a handful of blue clay and use the rolling pin to flatten the clay (like a thin pancake). Be sure to make the clay large enough to cover the entire Styrofoam ball. Do the same thing to the green and white clay. Use the spoon to cut out piece of white and green clay. Take the pieces and place them on the blue ball. Take the model and mount it on the stick.
