## QARs: Question-Answer Relationships

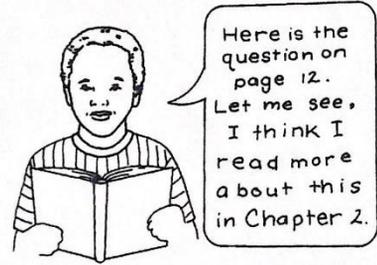

### Right There

This answer **can be easily found** in the book. It is right there on page \_\_\_\_\_.

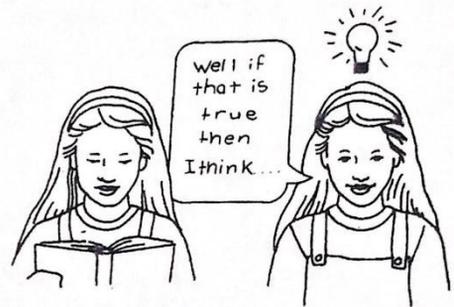

### Think and Search

The answer is in the story, but you need to **put together different story parts** to find it. The words for the question and the words for the answer are found in different parts of the story.

### Author and You

This answer **will not be found in the story**. Readers use information given in the story along with what the readers already know on their own. This is a higher-level question.

### On My Own

This answer will not be in the story. You can even answer the question without reading the story. **This answer comes from your own experiences and background.**
