

Technology for 21st Century Learning

This self-paced online course examines changes to the learning landscape, the employment scene and the resulting call for schools to respond to these changes. Explore proposals for the development of 21st century skills and how web-based technologies can be utilized to help schools engage today's learners and prepare them for a future that is characterized by change.

Available for 1 graduate academic credit through Andrews University (\$150 fee paid to AU).
